

"Tilting The Level Playing Field"

Councils in the UK are expected to deliver over 2,000 different types of service, from Abandoned vehicles to Zoo licensing. Every single one of those will be digital soon, and so totally dependant on software. Expensive software.

Wouldn't it be nice if your software was Free ?

Open Source Software delivers higher quality, at lower total cost and is available to anyone in a public library-like model. It uses a development model utterly in tune with democratic and grass roots government - and yet barely 1 in 70 tender adverts for software even mentions Open Source.

We want to kickstart four pilot projects right here in the conference to demonstrate that Open Source Software is the right development model for local government.

Why not join us for breakfast, 8am Weds 3rd July at the Rain Bar just 3 minutes away.
